

Now at WVU: Kidney Transplant

Admitted to Transplant Surgeon Service

- Important points:
 - Keep foley!
 - Need renal perfusion: permissive hypertension
 - Q6 hour labs: HCT/K+
 - Hemoglobin 7-8
 - CVP monitoring (goal >12)

**When in doubt, contact
SICU and primary team**

**Urine output is key indicator for
transplanted kidney function**

**STAT call to surgeon for sudden
drop in UOP**

- Fluid replacement for urine output
 - Maintenance at 40mL/hr +:
 - <300 mL/hr: replace 1:1 with ½ NS
 - >300 mL/hr, replace 2/3 with saline
 - Mildly decreased: ultrasound; gentle foley irrigation

**Leading cause of death:
asymptomatic cardiac issues**
