

MonaLisa Touch[®]

Gynecologic Health
A Novel Laser Therapy

A woman with blonde hair, wearing a light blue striped shirt, is sitting on a couch and smiling broadly. She is flanked by two other people, one on each side, who are also smiling and appear to be in a relaxed, social setting. The background is softly blurred, suggesting an indoor environment with warm lighting.

Become Yourself Again

MonaLisa Touch[®]

Gynecologic Health
A Novel Laser Therapy

It's OK to talk about **it.**TM

- “It” refers to changes in gynecologic health and it happens to a majority of women.
- As many as 50% of 64 million women are suffering from changes in their gynecologic health ^{1,2,3}

Because now you can do something about it.

A new procedure that patients have called “life-changing”.

- Gentle fractional CO₂ laser therapy
- Clinically proven to bring lasting relief
- Thousands of women successfully treated since 2012
- Overwhelmingly positive and immediate results

The reason for talking about the MonaLisa Touch.

Minimal side effects

No downtime

Lasting results

Postmenopausal
Women^{1,2,3}

are suffering from changes
in their gynecologic health.

But they don't have to.

MonaLisa Touch[®]

Clinically Proven to bring lasting relief.

A study was done by Dr. Stefano Salvatore*, Department of Obstetrics and Gynecology, Vita- Salute San Raffaele University to assess the feasibility of fractional CO₂ laser in the treatment of 50 women suffering changes in their gynecologic health.

- Overwhelmingly positive and immediate results
- Highly statistically significant improvement in symptoms after first treatment
- 42 patients (84%) showed significant improvement in their physical and mental quality of life scores over baseline and were satisfied with the treatment. Gynecologic symptoms were significantly improved.
