

## Medical Students on Neuro ICU

### First Day

1. Introduce self to the team
2. Select at least 1 (one) patient to follow and present on the next day.
3. Make sure staff knows what days you will not be available and why
4. Plan for completing required CEXs. Please do not leave to last day.
5. Study Four Rules of Four by Gates and be prepared to localize brainstem lesions.

### Day 2 – 5

1. See at least one patient daily before rounds.
2. Please let the resident and/or APP know what patient you are following.
3. When table rounds reaches your patient, please say that you have seen the patient and proceed with presentation.
4. Please attempt to position yourself so that you can clearly see the PACs machine for radiology rounds.
