

## **Caring for HPC (Hematopoietic Progenitor Cell) Transplant Patients**

- ◆ If transplant patient is transferred to ICU, they must be placed in the MICU
- ◆ BMT Survival Guide at bedside (guide is kept at Unit Clerk Desk and is emailed to all ICU RNs)
- ◆ A portable hepafiltration device will be placed in the ICU room for transplant recipients transferred to an ICU (call facilities)
- ◆ A laminated place card will be hung on all transplant recipient exterior doors to remind staff and visitors of basic infection control standards
- ◆ ICU nurses caring for the transplant recipient will be responsible for enforcing infection control standards with all visitors and hospital personnel entering a transplant recipient's room while in an ICU
- ◆ Transplant recipient will NOT be paired with any other patient assignment in isolation
