

After Hours X-ray Reads

- In Hospital films are not routinely reviewed by radiology after hours (evenings, nights, weekends, holidays)
- Radiology will read any film upon request.
- When an invasive procedure is done (ie central line) or a patient's condition changes the ICU resident needs to do the following:
- Look on Ruby Online
 - Find the resident on call for Radiology (not ED radiology)
 - Use the texting capability of the pager to request a read.
 - Text message should include Patient Name and film type and your return number (we highly recommend 75398 as you may get called away)
- Notify Dr. Wilson if you have problems with this or the CONNECT intranet is not correct.

Ultrasound for ICU

- The MICU/SICU share a Sono site ultrasound machine for the purposes of ultrasound usually associated with line placement.
- If you or a staff member need to utilize the Sono site machine the procedure for obtaining the equipment is to contact the MICU/SICU charge nurse (76116).
