AFTER HOURS X-RAY READS

- In Hospital films are not routinely reviewed by radiology after hours (evenings, nights, weekends, holidays)

- Radiology will read any film upon request.

- When an invasive procedure is done (ie central line) or a patient’s condition changes the ICU resident needs to do the following:

  - Look on Ruby Online
    Find the resident on call for Radiology (not ED radiology)
    Use the texting capability of the pager to request a read.
    Text message should include Patient Name and film type and your return number (we highly recommend 75398 as you may get called away)

- Notify Dr. Knight Davis if you have problems with this or the CONNECT intranet is not correct.
