CONSULTATIONS

When Calling A Consult:
We have several services that are provided by sharing call with several departments. The following has been decided by the Chairs of the Depts.:

A consult is called to the service that is on call on the day the injury is identified. The consult is not based off the day of admission.

Consults Provided by Trauma/Emergency Surgery:
1. We respond to any consult that is relevant to TRAUMA no matter where the patient is located, ie: ED, floor, MICU. Please use the TRAUMA H&P for documentation.
2. We provide PEG and trach consults to the ICU services.
