

COMING SOON to EPIC: Extubation Panel

What: An extubation panel was created to require providers to designate an extubation as “ROUTINE” vs. “COMPASSIONATE/TERMINAL”.

Why: Delineating extubations will best prepare the care team to meet all necessary requirements of care both prior to and following extubation.

i.e. Oxygen support, Incentive Spirometry, Aspiration Screening, notification of Organ Procurement Organization (CORE), Consult to Spiritual Care, RN/RT Extubation Time-Out

How: Compassionate extubation order received. RN and RT to perform **in person pre-procedural** huddle and confirm all aspects of care are complete before extubating.

EXTUBATION PANEL

- ROUTINE EXTUBATION
- COMPASSIONATE/TERMINAL EXTUBATION

When: February 14th Go-Live
