

# TBI Guidelines

## Mild GCS 13-15

No Anticoagulation/  
anti-platelets  
Normal CT Brain  
LOC <5 min

+Anticoagulation/  
anti-platelets  
LOC >5 min  
Abnormal CT Brain

Consideration for  
D/C from the ED if  
no other injuries  
and baseline neuro  
status

Admission floor or SDU  
Neurosurgery consult  
Consider reversal of  
anticoagulation

## Moderate

GCS 9-12  
+CT Brain findings

- Admission to ICU with q 1 hour neuro checks
- Neurosurgical consultation
- Consider reversal of anticoagulation
- Follow ICU Management Guidelines
- Repeat CT brain

## Severe

GCS ≤ 8  
+CT Brain Findings

- Admission to ICU with q 1 hour neuro checks
- Neurosurgical consultation
- Consider reversal of anticoagulation
- Follow ICU Management Guidelines
- Repeat CT brain
