

Radiography Program

Mission Statement

The Radiography program at West Virginia University Hospitals serves to facilitate the growth and development of the entry-level professional in the Radiologic Sciences thus supporting the mission of our sponsoring institution. Through continued technological advancement and a strong commitment to education, West Virginia University Hospitals serves as the foundation on which students can cultivate and expand their knowledge of the technical, professional, and philosophical aspects of Radiologic Technology and the health care environment. The program strives to provide our students with an educational environment that is conducive to attaining positive learning outcomes and is comprehensive in providing clinical experience and patient care opportunities.
