

Annual Wellness/Prevention Visit with Your Primary Care Provider

All WVU Medicine employees and covered spouses of Union employees will need to visit with their primary health care provider for a wellness/prevention visit sometime between 1/1/16 - 3/10/17 to receive the Key Rewards discount on insurance premiums for 2017. This check-up is a benefit provided at no cost to WVU Medicine employees insured by Highmark.

There is no form required for documentation of this appointment. Your visit will be captured through billing codes. To ensure this is coded correctly, make sure when scheduling your appointment to ask for **an annual "wellness" or "prevention" appointment.**

The deadline to have the appointment is March 10, 2017.

Please note:

All wellness screenings for Plan Year 2017 **MUST** be completed through an annual wellness/prevention visit with a primary care provider. Biometric values taken by a primary care provider during this visit can count for wellness screenings and will be AUTOMATICALLY PULLED after the employee has completed the online Wellness Consent and Tobacco Affidavit in **MyWVUChart**. The MOST RECENT biometric values (**up to March 10**) will be pulled.

If you do not have a primary health care provider, please call one of the following clinics to establish care:
