What is a provider-based clinic?

Some [WVU Medicine](#) hospitals own and operate provider-based-clinics. Based on regulations issued by the Centers for Medicare and Medicaid Services, “provider-based” refers to services provided in an outpatient clinic or location that is clinically and financially integrated with a hospital. Patients benefit because hospital outpatient clinics and locations are subject to additional quality standards and are monitored by [The Joint Commission](#), an independent, not-for-profit organization that accredits and certifies healthcare organizations and programs in the United States.

What does this mean for me as a patient?

You are receiving services at a provider-based clinic or location that is:

- Owned and operated by a WVU Medicine hospital
- Clinically and financially integrated with a WVU Medicine hospital

How does receiving care at a provider-based clinic affect billing?

The provider-based reimbursement model generates two separate bills:

- One bill for the physician service
- Another for the hospital/facility resources and services

Provider-based locations at: **J.W. Ruby Memorial Hospital**
