Document Acronyms

The following acronyms are used throughout this document:

Acronym	Definition
ACA	Affordable Care Act
CHIP	Community Health Improvement Plan
CHNA	Community Health Needs Assessment
GMH	Grant Memorial Hospital
Health Affairs	West Virginia University Health Affairs Institute
WVU	West Virginia University

1 Background and Introduction

Provisions in the Affordable Care Act (ACA) of 2010 require tax-exempt (non-profit) hospitals to conduct a Community Health Needs Assessment (CHNA) and develop a Community Health Improvement Plan (CHIP) at least every three years. The regulations for the CHNA include defining the hospital's service area and compiling demographics and analysis of health indicators; considering input from the community, including public health professionals; identifying resources; and prioritizing community health needs. The 2025 Grant Memorial Hospital (GMH) CHNA identifies the following prioritized needs.

- Substance Use
- Cancer
- Obesity, Physical Activity, and Diabetes

This document serves as a roadmap for the CHIP, which will be developed following the completion of the 2025 CHNA and will specify planned actions to be taken by GMH and community partners, available resources, anticipated steps, and a plan for evaluating these activities. GMH partnered with West Virginia University's Health Affairs Institute to complete this CHNA. A CHNA leadership team including hospital and community representation was convened by GMH to inform and guide the process.

1.1 About Grant Memorial Hospital

Grant Memorial Hospital is a not-for-profit critical access facility with 25 licensed acute care beds, serving citizens of Grant, Hardy, Pendleton, Hampshire, and Mineral Counties. GMH opened in April 1958 to provide inpatient and outpatient services to the citizens of the Upper South Branch Valley. In modern day, GMH's more than 350 employees and a medical staff of over fifteen serve the Potomac Highlands region.

1.2 Previous GMH CHNA Findings

The most recent GMH CHNA was adopted in 2022. It included a review of secondary data to assess socioeconomic characteristics, as well as key risk factors facing the community. A primary data collection was conducted in the service area. The final report identified four main health priorities, with goals and strategies for each:

- Substance Use
- Obesity and Chronic Disease
- Mental Health
- Cancer

1.3 Definition of the Community Served

For the 2025 process, the CHNA leadership team defined the community served as Grant, Hampshire, Hardy, Mineral, and Pendleton counties in West Virginia.

Figure 1: GMH Service Area

Grant Memorial Hospital County Coverage

WVU Health Affairs Institute

Table 1 contains information from the US Census Bureau and shows the most current QuickFacts (Appendix A) for the five counties in Grant Memorial Hospital's service area. It outlines some basic demographics, as well as information about health insurance coverage and poverty levels.

Table 1: US Census QuickFacts - WV Service Counties

	Grant, WV	Hampshire, WV	Hardy, WV	Mineral, WV	Pendleton, WV
Population	10,971	23,793	14,335	26,778	5,944
Residents under 18	19.4%	17.9%	19.4%	19.9%	18.6%
Non-white or +1 race	3.0%	3.5%	6.5%	5.7%	5.1%
Hispanic or Latino	1.1%	1.8%	4.5%	1.1%	1.3%
High school education or more	90.4%	88.7%	86.6%	93.3%	87.2%

Bachelor’s degree or more	17.9%	16.3%	15.7%	22.8%	20.5%
Under 65 yrs. and no insurance	8.6%	8.2%	8.0%	5.4%	9.2%
Persons living in poverty	16.6%	14.2%	13.8%	13.9%	13.9%

2 Methodology and Community Input Process

The CHNA process began with a thorough review of the previous cycle’s needs assessment priorities and included review of publicly available secondary data related to counties within Grant Memorial Hospital’s service areas. These data included the above US Census data and County Health Rankings Data (Appendix B). Using these reports to begin, the leadership team started the initial discussion around health needs, changes in each hospital community’s demographics over the previous few years, and lessons learned from the last CHNA cycle’s health topic prioritization and development of implementation activities. Primary data collection was comprised of surveying community members in the service area to gather perceptions of health issues, quality of life, and other related topics. Survey data was analyzed and presented back to the leadership team and community partners of Grant Memorial Hospital. This presentation was focused on reviewing the survey data, discussing community assets that may help inform community benefit planning for Grant Memorial Hospital’s CHNA process, as well as discussing the needs of those not well-represented in the survey data.

2.1 Primary Methods of Collecting and Analyzing Information

Two primary sources of data were utilized to inform the CHNA: (1) a public input survey and (2) a data presentation to leadership and community partners. The public input survey (Appendix C) was developed by WVU Health Affairs with the Grant Memorial Hospital’s CHNA leadership team. Survey topics included questions about specific health issues, thoughts on overall health of the community, quality of life, access to care, and medical needs (including specialist care), risky behaviors, and demographic information including geographic location and income.

To hear public feedback, data was collected anonymously from residents aged 18 and older from February 19th to June 4th, 2025. The survey was disseminated via a web-based platform called Qualtrics. Collection efforts included dissemination via MyChart, and reached local residents via social media, other local information channels, and with assistance from hospital partners and civic organizations. The survey was not intended to be a representative, scientific sample of residents of these five counties, but rather a mechanism to solicit the community’s perception of health needs. A total of 395 surveys were completed by community members from the area. Noteworthy limitations included disproportionately low representation from males, from the lower-income population of these counties, and from non-white community members.

Figure 2: Response by County

Q1 - In which county do you currently live?

At the conclusion of the survey data collection, analysis was conducted by the WVU Health Affairs team. Results were presented back to the Leadership Team in aggregate (Appendix D), and broken down by income, age, and other demographics to ensure there was no significant variation in responses among groups (Appendix E). The team discussed the data alongside known health issues in the community, experiences in their own clinical and other professional settings, resources already in place to address some of the top issues, and initial thoughts about further addressing the most prevalent community concerns.

Additional information was collected through feedback at a virtual data presentation hosted in August 2025. This session solicited input about community health needs and sought to identify groups and organizations already providing essential services. Survey results were presented to this group and strategies for improving health outcomes in the top areas were discussed. More details on the makeup of this session are found below.

2.2 Leadership Team and Community Partners

Grant Memorial Hospitals' CHNA leadership team and provided detailed input throughout the process of developing the CHNA. These individuals informed the public input survey and were instrumental in dissemination. Additionally, they were charged as a group with collaborative discussion of primary and secondary data to determine health priorities, and worked to compile a list of existing resources, programs, and policies, as well as fresh ideas or potential partnerships for addressing each area of concern.

Leadership Team

- Grant Memorial Hospital
- Community partners

3 Community Health Needs Prioritization

Following the data presentation, the leadership team discussed all input together and identified priority areas to address through implementation strategies. Leadership reviewed closely the top concerns raised across all categories including health and disease, quality of life, environment, and risky behaviors (see tables 3-5 below).

Table 2: Community Health Perceptions Survey - Health and Disease

Top Five Health and Disease Concerns	
Drug and/or alcohol use	44%
Cancers	41%
Obesity	41%
Mental health problems	32%
Diabetes	30%

Table 3: Community Health Perceptions Survey - Quality of Life and Environment

Top Five Quality of Life and Environmental Concerns	
Cost of health care and or medications	59%
Limited organized activities	29%
Limited job opportunities	28%
Lack of health opportunities	27%
Poverty	21%

Table 4: Community Health Perceptions Survey - Risky Behaviors

Top Five Risky Behavior Concerns	
Drug use	71%
Lack of exercise	35%
Excessive alcohol use	32%
Poor nutrition	30%
Child abuse and neglect	27%

Health issues were largely consistent when comparing datasets across demographics. For example, when asked to pick the three most important problems related to health and disease in their county both men and women listed drug and alcohol use as their top concern, with obesity, mental health problems, and diabetes in the overall top concerns of both of these demographics. For men, heart problems were also in the “top 5”, while women identified cancer as a main issue. Drug and alcohol abuse, cancer, obesity, and mental health issues were all among the top concerns of both white and non-white respondents. Across income levels, and in households with and without children, drug and alcohol abuse, cancer, and obesity are

consistently among the top health concerns. Mental health, aging problems, and diabetes also all rotate throughout the top five spots for these demographic groups. Even when accounting for age, we do not see a big difference in “top three” health topics. Respondents aged 65 or older tended to name cancer, obesity, and drug and alcohol use as their top concerns. Those younger than age 65 responded similarly, naming substance use, drug and alcohol abuse, obesity, and cancer as their “top three”.

When respondents were asked to pick the three most important problems related to quality of life and environment in their county, these also shared a common theme. Cost of health care and medications, limited organized activities for young people, limited job opportunities, lack of health insurance or limited coverage, and poverty were all issues that appeared among top concerns. Limited quality housing, and food insecurity or limited ability to get nutritious foods also ranked high on the list and are important public concerns to note.

When asked to pick the top three topics related to risky behaviors in their county, the respondents picked topics tied in directly with all the above. Drug use, lack of exercise, excessive alcohol use, poor nutrition, and child abuse and neglect were issues that appeared at the top of all datasets. When asked in an open-ended question for suggestions to address health concerns, those who took the survey frequently answered with ideas that fell into the following categories:

- Community Recreation – activities and spaces for all ages; safe places for exercise and social connection
- Access to care – PCP and specialists; includes cost of health care, prescriptions, and transportation access
- Built environment – trails, sidewalks, safe outdoor spaces for physical activity
- Education – public education systems, community education
- Nutrition – health restaurants and grocery options, food assistance, programs/classes

3.1 Prioritization Process

The existing secondary data, new survey data, data presentation input, and lessons learned from the last CHNA cycle all factored into Grant Memorial Hospital leadership’s prioritization decisions. The group considered the degree to which the hospital can affect health outcomes for each topic, projects, or programs already underway for each, as well as level of importance placed on each by the community relative to the reach of GMH’s impact. Leadership paid particular attention to the demographics of respondents compared to the community (Appendix F), feedback gathered about access to health care (Appendix G), and other areas and demographics they know to be of particular concern in their community. Within this discussion of where and how the hospital can realistically affect community wellbeing and health outcomes, what they could accomplish in collaboration with new and existing partners, and what topics to monitor and revisit later, the list of top health concerns was organized into three areas that will be the focus moving forward with implementation planning.

- Substance Use
- Cancer
- Obesity, Physical Activity, and Diabetes

3.2 Potential Resources

The following table documents ideas for implementation strategy development, as well as organizations identified whose missions are aimed at addressing top health concerns. These organizations could potentially aid in addressing health concerns identified in this CHNA.

Table 5: Potential Community Resources

Potential Community Resources
Education about available resources and services
Health screenings available to all
Local Health Department
Nutrition education and resources
Outreach to smaller towns
Partnerships with faith communities
Senior Center
Trail development; designated outdoor spaces
Youth activities - bowling, running events, recreational sports and other outdoor activities

4 Conclusion

Each of the top priorities identified in the 2025 CHNA are consistent with concerns raised in 2022. The 2025 CHNA identified four priorities to guide GMH's efforts to improve the health of community members:

- Substance Use
- Cancer
- Obesity, Physical Activity, and Diabetes

Hospital leadership discussion of implementation planning steps is already underway, as is consideration of new program opportunities. The Health Affairs Team will work with the hospital to develop their Community Health Implementation Plan (CHIP), which will serve as their roadmap for continuing or building community benefit strategies.

Value Notes

 Methodology differences may exist between data sources, and so estimates from different sources are not comparable.

Some estimates presented here come from sample data, and thus have sampling errors that may render some apparent differences between geographies statistically indistinguishable. Click the Quick Info  icon to the left of each row in TABLE view to learn about sampling error.

The vintage year (e.g., V2024) refers to the final year of the series (2020 thru 2024). Different vintage years of estimates are not comparable.

Users should exercise caution when comparing 2019-2023 ACS 5-year estimates to other ACS estimates. For more information, please visit the [2023 5-year ACS Comparison Guidance](#) page.

Fact Notes

- (a) Includes persons reporting only one race
- (b) Hispanics may be of any race, so also are included in applicable race categories
- (c) Economic Census - Puerto Rico data are not comparable to U.S. Economic Census data

Value Flags

- D Suppressed to avoid disclosure of confidential information
- F Fewer than 25 firms
- FN Footnote on this item in place of data
- NA Not available
- S Suppressed; does not meet publication standards
- X Not applicable
- Z Value greater than zero but less than half unit of measure shown
- Either no or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest or upper interval of an open ended distribution
- N Data for this geographic area cannot be displayed because the number of sample cases is too small.

Thank you for taking this **Community Health Perceptions Survey** - your thoughts are important to us and will benefit the people who live in your County. Survey results will be used to help guide Grant Memorial Hospital's health programs and address community members' health concerns. This survey is anonymous - your answers will not be connected to you in any way. If you have recently completed this survey, there is no need to do so again. You may skip any question that you would prefer not to answer. Please feel free to share this link with other members of your community.

Thank you for your time and please contact us if you have any questions or need help completing this survey. Emily Sarkees, WVU Health Affairs Institute, emily.sarkees@hsc.wvu.edu.

Q1 In which county do you currently live?

- ☐ Grant
- ☐ Hampshire
- ☐ Hardy
- ☐ Mineral
- ☐ Pendleton
- ☐ Somewhere Else _____

Q2 What is your age?

- ☐ Less than 18 years
- ☐ 18 to 29 years
- ☐ 30 to 39 years
- ☐ 40 to 49 years
- ☐ 50 to 64 years
- ☐ 65 years or more

Q3 What do you think is the most important health problem or issue for the community where you live?

Q4 From the following list, which do you think are the 3 most important problems related to health and disease in your county? Please choose ONLY 3.

- ☐ Aging problems
- ☐ Anxiety
- ☐ Cancers
- ☐ Chronic disease
- ☐ COVID-19
- ☐ Dental problems
- ☐ Diabetes ("sugar")
- ☐ Depression/hopelessness
- ☐ Drug and/or alcohol use
- ☐ Heart problems
- ☐ High blood pressure
- ☐ Mental health problems
- ☐ Obesity
- ☐ Respiratory/lung disease/asthma
- ☐ Other _____

Q5 From the following list, which do you think are the 3 most important problems related to quality of life and environment in your county? Please choose ONLY 3.

- ☐ Chronic loneliness or isolation
- ☐ Cost of health care and/or medications
- ☐ Homelessness
- ☐ Lack of health insurance or limited health coverage
- ☐ Limited ability to get healthy food or enough food
- ☐ Limited access to transportation
- ☐ Limited affordable/quality housing
- ☐ Limited job opportunities
- ☐ Limited organized activities for children and teens
- ☐ Limited places to play or healthy activities for kids

- ☐ Limited safe places to walk, bike, etc.
- ☐ Limited social services or programs
- ☐ Poverty
- ☐ Water/air quality
- ☐ Other _____

Q6 From the following list, which do you think are the 3 most important risky behaviors in your county? Please choose ONLY 3.

- ☐ Excessive alcohol use
- ☐ Child abuse and neglect
- ☐ Crime
- ☐ Distracted driving (cellphone use)
- ☐ Domestic violence
- ☐ Drug use
- ☐ Gambling
- ☐ Impaired driving (drugs/alcohol)
- ☐ Lack of exercise
- ☐ Not getting recommended immunizations
- ☐ Poor nutrition
- ☐ Tobacco
- ☐ Vaping
- ☐ Other _____

Q7 Can you think of something that would help improve the health of your community?

Q8 What type of health insurance coverage do you have? (Select all that apply)

- ☐ Private health insurance (e.g., through your employer, union, family member, or private plan)
- ☐ Public health insurance (e.g., Medicaid, Medicare, VA services, Tricare, Chip, or Indian Health Services)
- ☐ Uninsured (i.e., no health insurance coverage)
- ☐ Other (please specify) _____

Q9 I know how to access medical care in my community.

- ☐ Strongly disagree
- ☐ Somewhat disagree
- ☐ Neither agree nor disagree
- ☐ Somewhat agree
- ☐ Strongly agree

Q10 Please tell us your level of agreement with each of these sentences about your County:

	Strongly disagree	Somewhat disagree	Neither agree nor disagree	Somewhat agree	Strongly agree
I have access to good health care.					
I am satisfied with the medical care I receive.					
I am able to afford medical care when needed.					
I am able to afford medications when needed.					
I am able to get medical care when I need it.					
I am able to see specialists when needed.					
I am able to see my primary care doctor when needed.					
I am able to get mental health care when needed.					
I have access to a walk-in clinic or urgent care.					
I have access to public transportation.					
I can afford public transportation.					

Q11 What medical services or specialties would you like to see offered in your area?

Q12 Please tell us about access to telehealth medical care in your home.

- ☐ I do not have access to high-speed internet at home and cannot access telehealth medical care.
- ☐ I have high-speed internet, but it is not reliable or fast enough to use for telehealth medical care.
- ☐ I have high-speed internet at home, but would prefer not to use it for telehealth medical care.
- ☐ I have high-speed internet at home, but need more information about telehealth medical care before deciding.
- ☐ I have high-speed internet at home, and would be comfortable attending a telehealth medical appointment this way.

Q13 In the past 12 months, have you seen a medical provider for a routine check-up, wellness visit, or other preventive care?

- ☐ Yes
- ☐ No
- ☐ If no, why not? _____

Q14 Within the past 12 months the food we bought just didn't last and we didn't have money to get more.

- ☐ Often true
- ☐ Never true

Q15 Within the past 12 months we worried whether our food would run out before we got money to buy more.

- ☐ Often true
- ☐ Never true

Q16 What is your living situation today?

- ☐ I have a steady place to live
- ☐ I have a place to live today, but I am worried about losing it in the future
- ☐ I do not have a steady place to live (I am temporarily staying with others, in a hotel, in a shelter, living outside on the street, on a beach, in a car, abandoned building, bus or train station, or in a park)

Q17 Think about the place you live. Do you have problems with any of the following? Choose all that apply.

- ☐ Pests such as bugs, ants, or mice
- ☐ Mold
- ☐ Lead paint or pipes
- ☐ Lack of heat
- ☐ Oven or stove not working
- ☐ Smoke detectors missing or not working
- ☐ Water leaks
- ☐ None of the above

Q18 In the past 12 months has the electric, gas, oil, or water company threatened to shut off services in your home?

- ☐ Yes
- ☐ No
- ☐ Already shut off

Q19 In the past 12 months, has lack of reliable transportation kept you from medical appointments, meetings, work or from getting things needed for daily living?

- ☐ Yes
- ☐ No

Q20 How hard is it for you to pay for the very basics like food, housing, medical care, and heating?
Would you say it is:

- ☐ Very hard
- ☐ Somewhat hard
- ☐ Not hard at all

Q21 How often do you feel lonely or isolated from those around you?

- ☐ Never
- ☐ Rarely
- ☐ Sometimes
- ☐ Often
- ☐ Always

Q22 If for any reason you need help with day-to-day activities such as bathing, preparing meals, shopping, managing finances, etc., do you get the help you need?

- ☐ I don't need any help
- ☐ I get all the help I need
- ☐ I could use a little more help
- ☐ I need a lot more help

Q23 Do you have the social support of a community of faith, a recreation league or team, recovery group, or others with whom you can talk and enjoy yourself?

- ☐ Yes
- ☐ No
- ☐ Sometimes

Q24 What sex were you assigned at birth, on your original birth certificate?

- ☐ Male
- ☐ Female

Q25 How do you describe yourself? (select one)

- ☐ Male
- ☐ Female
- ☐ Transgender
- ☐ Do not identify as male, female, or transgender

Q26 Which of these groups best describes your race? Please select all that apply.

- ☐ White/Caucasian
- ☐ Asian
- ☐ Black or African American
- ☐ American Indian or Alaskan Native
- ☐ Native Hawaiian or Other Pacific Islander
- ☐ Other (please specify) _____

Q27 Are you of Hispanic or Latino origin or descent?

- ☐ Yes, Hispanic or Latino
- ☐ No, not Hispanic or Latino

Q28 What is the highest level of education you have completed?

- ☐ Less than high school graduate
- ☐ High school diploma or equivalent (GED)
- ☐ Some college or certification
- ☐ Technical or vocational degree/certification
- ☐ Associate degree
- ☐ Bachelor's degree or higher (includes any advanced degrees)

Q29 What is your estimated yearly household income?

- ☐ Less than \$15,000
- ☐ \$15,001 to \$20,000
- ☐ \$20,001 to \$25,000
- ☐ \$25,001 to \$30,000
- ☐ \$30,001 to \$35,000
- ☐ \$35,001 to \$40,000
- ☐ \$40,001 to \$50,000
- ☐ \$50,001 to \$60,000
- ☐ \$60,001 to \$70,000
- ☐ \$70,001 to \$85,000
- ☐ \$85,001 to \$100,000
- ☐ \$100,001 to \$150,000
- ☐ More than \$150,000
- ☐ Prefer not to answer

Q30 What is your marital status?

- ☐ Married or in a domestic partnership
- ☐ Divorced
- ☐ Never married
- ☐ Separated
- ☐ Widowed
- ☐ Other (please specify) _____

Q31 Tell us about your military status.

- ☐ I am a veteran
- ☐ I am currently active duty or in the reserves
- ☐ None of the above

Q32 How many children under the age of 18 live in your household? Please enter a whole number even if you are not the primary caregiver or biological parent.

Q33 How were you invited to complete this survey?

- ☐ MyChart invitation
- ☐ Personal email invitation
- ☐ My employer
- ☐ Social media
- ☐ Friend or family member
- ☐ Public school, library, or other community organization
- ☐ Other

Q34 Is there anything else you would like to say about health in your community?

Q14 If no, why not? - Text

8 Responses

If no, why not?

- Text

I have had medical appointments for ocd and anxiety so if that's considered a wellness checkup

too busy

No health insurance

I have not had the money to see the doctor

no insurance

too expensive i have insurance but cannot go because the bills are so expensive being charged for unneccarcy testing

No decent PCP

Can't afford

Yes	95%
If no, why not?	3%
No	2%

Q14_2 - If no, why not?

8 Responses

If no, why not?

- Text

I have had medical appointments for ocd and anxiety so if that's considered a wellness checkup

too busy

No health insurance

I have not had the money to see the doctor

no insurance

too expensive i have insurance but cannot go because the bills are so expensive being charged for unneccarcy testing

No decent PCP

Can't afford
