1 Background

In 2024, Thomas Hospitals prioritized the following health topics via their Community Health Needs Assessment process:

- Mental Health and Substance Use Disorder (SUD)
- Wellness Promotion: nutrition, obesity, chronic disease prevention, employer wellness programs
- Wellness Resources: education, transportation, promotion of community activities

2 Implementation

This pair of hospitals is in a transition phase and community benefit implementation details are forthcoming; however, the intention is to continue the kinds activities carried out in collaboration with the long-standing local coalition, KCCHI, and in expanded partnership with neighboring hospitals in the region. Some of these include mobile dental bus services and Bonnies Bus services to residents of the area.
