

Welcome to the United Hospital Center Family Medicine Residency Program!

It is my pleasure to welcome you to our program and give you a glimpse into what makes UHC Family Medicine such a special place to train. As chief resident, I have the privilege of working alongside an amazing group of residents, faculty, and staff who are dedicated not only to providing excellent patient care, but also to helping each resident grow into the physician they aspire to become.

One of the greatest strengths of our program is the breadth of training we offer within a supportive and close-knit environment. As family medicine physicians, we care for patients across generations and throughout every stage of life. Here at UHC, we gain meaningful experiences in outpatient medicine, inpatient care, pediatrics, women's health, behavioral health, and have great opportunities for electives that prepare us to practice comprehensive family medicine. Head over to our rotation schedule tab to get a glimpse into what each year of training looks like!

Our training here is great, but what truly sets UHC apart is our people. Our residents work hard and hold one another to a high standard, but we also genuinely support each other. We celebrate each other's accomplishments, help one another through challenging times, and share plenty of laughs along the way. Our faculty are approachable and invested in our education. They are further committed to creating an environment where residents feel comfortable asking questions and taking ownership of their learning to best tailor their experiences to their interests after residency.

Being located in Bridgeport, West Virginia, also gives our residents the opportunity to enjoy a wonderful quality of life outside of residency. The community offers the feel of a welcoming, close-knit town while providing convenient access to the amenities of larger cities. With beautiful Appalachian scenery, outdoor recreation, local restaurants, and a strong sense of community, Bridgeport is a place where you can build both a career and a life. If you want a more personal look into resident life and wellness, check out our Instagram page!

Residency is an important chapter in our lives and choosing where to train is a deeply personal decision. I encourage you to get to know our residents, meet our faculty, explore our community, and experience the culture that makes UHC Family Medicine residency unique.

We look forward to meeting you!

Cheyenne Earle, DO

Chief Resident
