Document Acronyms

The following acronyms are used throughout this document:

Acronym	Definition
ACA	Affordable Care Act
CHIP	Community Health Improvement Plan
CHNA	Community Health Needs Assessment
Health Affairs	West Virginia University Health Affairs Institute
PCP	Primary Care Physician
SUD	Substance Use Disorder
WVU	West Virginia University

1 Background and Introduction

Provisions in the Affordable Care Act (ACA) of 2010 require tax-exempt (non-profit) hospitals to conduct a Community Health Needs Assessment (CHNA) and develop a Community Health Improvement Plan (CHIP) at least every three years. The regulations for the CHNA include defining the hospital's service area and compiling demographics and analysis of health indicators; considering input from the community, including public health professionals; identifying resources; and prioritizing community health needs. The 2025 Uniontown Hospital CHNA identifies the following prioritized needs.

- Substance Use and Mental Health
- Obesity and Diabetes
- Cancer

This document serves as a roadmap for the CHIP, which will be developed following the completion of the 2025 CHNA and will specify planned actions to be taken by the hospital and community partners, available resources, anticipated steps, and a plan for evaluating these activities. Uniontown Hospital partnered with West Virginia University's Health Affairs Institute to complete this CHNA using a community-based process designed to engage representation of community members. A CHNA leadership team including hospital and community representation was convened by the hospital to inform and guide the process.

1.1 About Uniontown Hospital

Uniontown Hospital is a compassionate, dedicated community hospital providing a full range of medical care to residents of Fayette County and the surrounding areas for more than a century. Health care services provided at this acute and specialty care hospital include WVU Medicine Heart and Vascular Institute, WVU Medicine Rockefeller Neuroscience Institute, WVU Medicine Cancer Institute, an award-winning Stroke Center, the Wound Healing Center, the Orthopedic and Spine Institute, the Uniontown Hospital Sleep Clinic, and Uniontown Urology Associates. Services also include emergency care, a full range of surgical care, pain management, pulmonary care, inpatient rehabilitation services, and complete diagnostic and laboratory services. The 145-bed facility is utilized by more than 200 medical staff representing more than 30 medical specialties. In addition to hospital-based services, Uniontown Hospital also operates an Outpatient Diagnostic Center in South Union Township, Fayette County, which provides a wide range of laboratory and diagnostic testing, as well as a sub-specialty clinic in Connellsville, a pediatric clinic in conjunction with WVU Medicine Children's in South Union Township, and primary care offices in Uniontown, Connellsville, and Carmichaels.

1.2 Previous Uniontown Hospital CHNA Findings

The most recent Uniontown Hospital CHNA was adopted in 2022. It included a review of secondary data to assess socioeconomic characteristics, as well as key risk factors facing the community. A primary data collection was conducted in the service area, and further resident

input was gathered at a community meeting hosted by the hospital. The final report identified the following health priorities, with goals and strategies for each:

- Substance Use and Mental Health
- Obesity and Co-morbid Illness
- Cancer

1.3 Definition of the Community Served

For the 2025 process, the CHNA leadership team defined the community served as Fayette and Greene Counties in Pennsylvania.

Figure 1: Uniontown Hospital Service Area

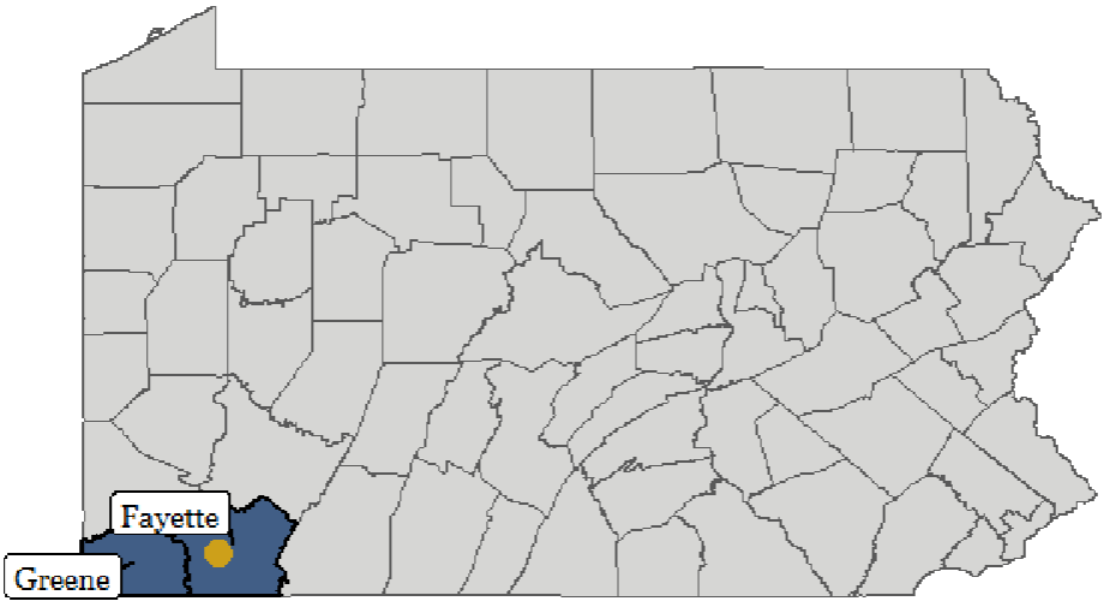

Table 1 contains information from the US Census Bureau and shows the most current QuickFacts (Appendix A) for the two counties in Uniontown Hospital's service areas. It outlines some basic demographics, as well as information about health insurance coverage and poverty levels.

Table 1: US Census QuickFacts – Service Area Counties

	Fayette, PA	Greene, PA
Population	123,941	33,960
Residents under 18	18.9%	18.7%
Non-white or +1 race	7.9%	5.9%
Hispanic or Latino	1.5%	1.6%
High school education or more	90.0%	89.9%
Bachelor's degree or more	18.9%	21.1%
Under 65 yrs. and no insurance	6.5%	6.4%
Persons living in poverty	18.9%	15.5%

Table Notes: [1] https://www.census.gov/quickfacts/fact/table/US/PST045219

2 Methodology and Community Input Process

The CHNA process began with a thorough review of the previous cycle's needs assessment priorities and included review of publicly available secondary data related to counties within Uniontown Hospital's service areas. These data included the above US Census data and County Health Rankings Data (Appendix B). Using these reports to begin, the leadership team started the initial discussion around health needs, changes in each hospital community's demographics over the previous few years, and lessons learned from the last CHNA cycle's health topic prioritization and development of implementation activities. Primary data collection was comprised of surveying community members in a combined service area to gather perceptions of health issues, quality of life, and other related topics. Survey data was analyzed and presented back to the leadership team of Uniontown Hospital. This presentation was focused on reviewing the survey data, discussing community assets that may help inform community benefit planning for Uniontown Hospital's CHNA process, as well as discussing the needs of those not well-represented in the survey data.

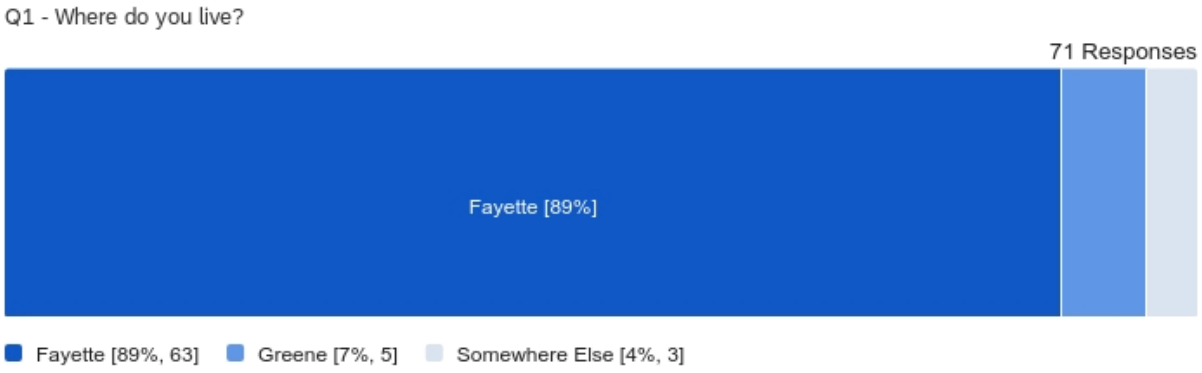
2.1 Primary Methods of Collecting and Analyzing Information

Two primary sources of data were utilized to inform the CHNA: (1) a public input survey and (2) a data presentation and discussion. The public input survey (Appendix C) was developed by WVU Health Affairs with the Uniontown Hospital's CHNA leadership team. Survey topics included questions about specific health issues, thoughts on overall health of the community, quality of life, access to care, and medical needs (including specialist care), risky behaviors, and demographic information including geographic location and income.

To hear public feedback, data was collected anonymously from residents aged 18 and older from February 27th to May 9th, 2025. The survey was disseminated via a web-based platform called Qualtrics. Collection efforts included dissemination via hospital partners and staff, and

reached residents via social media, other local information channels, and with assistance from partners and civic organizations. The survey was not intended to be a representative, scientific sample of residents of these two counties, but rather a mechanism to solicit the community's perception of health needs. A total of 76 surveys were completed by community members from the area. Noteworthy limitations included disproportionately low representation from males, from the lower-income population of these counties, and from non-white community members.

Figure 2: Response by County



At the conclusion of the survey data collection, analysis was conducted by the WVU Health Affairs team. Results were presented back to the Leadership Team in aggregate (Appendix D), and broken down by income, age, and other demographics to ensure there was no significant variation in responses among groups (Appendix E). The team discussed the data alongside known health issues in the community, experiences in their own clinical and other professional settings, resources already in place to address some of the top issues, and initial thoughts about further addressing the most prevalent community concerns.

Additional information was collected through feedback at a virtual data presentation hosted on May 15th 2025. This session solicited input about community health needs and sought to identify groups and organizations already providing essential services. Survey results were presented to this group and strategies for improving health outcomes in the top areas were discussed. Input from the event was compiled and will be used for reference at the community benefit planning stage.

2.2 Leadership Team and Community Partners

The following organizations were represented on Uniontown Hospital's CHNA leadership team and provided detailed input throughout the process of developing the CHNA. These individuals informed the public input survey and were instrumental in dissemination. Additionally, they were charged as a group with collaborative discussion of primary and secondary data to determine health priorities.

Leadership Team

- Uniontown Hospital Administration and Providers
- Fayette County Chamber of Commerce

3 Community Health Needs Prioritization

Following the data presentation, the leadership team discussed all input together and identified priority areas to address through implementation strategies. Leadership reviewed closely the top concerns raised across all categories including health and disease, quality of life, environment, and risky behaviors (see tables 2-4).

Table 2: Community Health Perceptions Survey – Health and Disease

Top Five Health and Disease Concerns	
Obesity	61%
Drug and/or alcohol use	61%
Mental health problems	44%
Diabetes	30%
Cancers	23%

Table 3: Community Health Perceptions Survey – Quality of Life and Environment

Top Five Quality of Life and Environmental Concerns	
Cost of health care and or medications	66%
Lack of health insurance or limited coverage	30%
Limited access to transportation	29%
Poverty	25%
Chronic loneliness or isolation	21%
Limited organized activities	21%

Table 4: Community Health Perceptions Survey – Risky Behaviors

Top Five Risky Behavior Concerns	
Drug use	70%
Child abuse and neglect	39%
Excessive alcohol use	38%
Lack of exercise	34%
Poor nutrition	32%

Health issues were largely consistent when comparing datasets across demographics. For example, when asked to pick the three most important problems related to health and disease in their county both men and women listed obesity, drug and alcohol abuse, mental health issues, and diabetes in their overall top concerns. Men also tended to indicate aging problems were an issue, while women listed cancer among their top health concerns. Across income levels, and in households with and without children, drug and alcohol abuse, mental health issues, and obesity are consistently among the top health concerns. Diabetes and cancer also rotate throughout the top five spots for these demographic groups. Even when accounting for age, we do not see a big difference in top health topics. Respondents aged 50 or older tended to name obesity, drug and alcohol use, and diabetes as their top concerns. Those younger than age 50 tended to be concerned about drug and alcohol abuse, obesity, and mental health issues.

When respondents were asked to pick the three most important problems related to quality of life and environment in their county, responses also shared a common theme. Cost of health care and medications, lack of health insurance or limited coverage, limited access to transportation, and poverty were top concerns. Others included chronic loneliness or isolation, limited organized activities for young people, and limited ability to access nutritious food were all issues that appeared among top concerns.

When asked to pick the top three topics related to risky behaviors in their county, the respondents picked topics tied in directly with all the above. Drug use, child abuse and neglect, excessive alcohol use, lack of exercise, and poor nutrition were issues that appeared at the top of all datasets. When asked in an open-ended question for suggestions to address these issues, those who responded to the survey frequently answered with ideas that fell into the following categories:

- Community Involvement and Recreation – activities and spaces for all ages; safe places for exercise and social connection
- Community resources and transportation access
- Education – public education systems, community education
- Nutrition – health restaurants and grocery options, food assistance, programs/classes

3.1 Prioritization Process

The existing secondary data, new survey data, data presentation input, and lessons learned from the last CHNA cycle all factored into hospital leadership's prioritization decisions. The group considered the degree to which the hospital can affect health outcomes for each topic, projects, or programs already underway for each, as well as level of importance placed on each by the community relative to the reach of Uniontown Hospital's impact. Leadership paid particular attention to the demographics of respondents compared to the community (Appendix F), feedback gathered about access to health care (Appendix G), as well as other areas and demographics they know to be of particular concern in their community. Within this discussion of where and how the hospital can realistically affect community wellbeing and health outcomes, what they could accomplish in collaboration with new and existing partners, and what topics to monitor and revisit later, the list of top health concerns was organized into specific areas that will be the focus moving forward with implementation planning.

- Substance Use and Mental Health
- Obesity and Diabetes
- Cancer

3.2 Potential Resources

The following table documents ideas for implementation strategy development, as well as organizations identified during the community meeting whose missions are aimed at addressing top health concerns. These organizations could potentially aid in addressing health concerns identified in this CHNA.

Table 5: Potential Community Resources and Ideas

Potential Community Resources and Ideas
Cancer awareness activities - June
Chestnut Ridge Counseling Services
Diabetic retinal screenings to prevent diabetes-related blindness
Drug takeback days
Increase breast cancer screenings
Labor & Delivery partnerships to address SUD
Once Voice One Community after school curriculum to address health care careers
Pain management service line
Patient picnic
Primary care connection with weight management program at JWRM Hospital

Recruitment efforts focusing on community opportunities
Survivorship program
WVU / Amwell partnership in ED

4 Conclusion

Each of the top priorities identified in the 2025 CHNA are consistent with concerns raised in 2022. The 2025 CHNA identified priorities to guide Uniontown Hospital's efforts to improve the health of community members:

- Substance Use and Mental Health
- Obesity and Diabetes
- Cancer

Hospital leadership discussion of implementation planning steps is already underway, as is consideration of new program opportunities with the Health Affairs team and with their external community partners. The Health Affairs team will work with the hospital to develop their Community Health Implementation Plan (CHIP), which will serve as their roadmap for continuing or building community benefit strategies.

Community Health Perceptions Survey 2025

Thank you for taking this Community Health Survey - your thoughts are important to us and will benefit the people who live in your County. Survey results will be used to help guide Uniontown Hospital's health programs and address community members' health concerns. This survey is anonymous - your answers will not be connected to you in any way. If you have recently completed this survey, there is no need to do so again. You may skip any question that you would prefer not to answer. Please feel free to share this link with other members of your community.

Thank you for your time and please contact us if you have any questions or need help completing this survey. Emily Sarkees, WVU Health Affairs Institute, emily.sarkees@hsc.wvu.edu.

In which county do you currently live?

- o Fayette
- o Greene
- o Somewhere Else

(Display This Question: If "Somewhere Else" selected in Q1)

Q2 In which county and state do you live?

- o County _____
- o State _____

Q3 What is your age?

- o Less than 18 years
- o 18 to 29 years
- o 30 to 39 years
- o 40 to 49 years
- o 50 to 64 years
- o 65 years or more

(Skip To: End of Survey If What is your age? = Less than 18 years)

Q4 What do you think is the most important health problem or issue for the community where you live?

_____

Q5 From the following list, which do you think are the 3 most important problems related to health and disease in your county? Please choose ONLY 3.

- ▢ Aging problems
- ▢ Anxiety
- ▢ Cancers
- ▢ Chronic disease
- ▢ COVID-19
- ▢ Dental problems
- ▢ Diabetes ("sugar")
- ▢ Depression/hopelessness
- ▢ Drug and/or alcohol use
- ▢ Heart problems
- ▢ High blood pressure
- ▢ Mental health problems
- ▢ Obesity
- ▢ Respiratory/lung disease/asthma
- ▢ Unprotected or unsafe sexual behaviors
- ▢ Other _____

Q6 From the following list, which do you think are the 3 most important problems related to quality of life and environment in your county? Please choose ONLY 3.

- ▢ Chronic loneliness or isolation
- ▢ Cost of health care and/or medications
- ▢ Homelessness
- ▢ Lack of health insurance or limited health coverage
- ▢ Limited ability to get healthy food or enough food

- ▢ Limited access to transportation
- ▢ Limited affordable/quality housing
- ▢ Limited job opportunities
- ▢ Limited organized activities for children and teens
- ▢ Limited places to play or healthy activities for kids
- ▢ Limited safe places to walk, bike, etc.
- ▢ Limited social services or programs
- ▢ Poverty
- ▢ Water/air quality
- ▢ Other _____

Q7 From the following list, which do you think are the 3 most important risky behaviors in your county? Please choose ONLY 3.

- ▢ Excessive alcohol use
- ▢ Child abuse and neglect
- ▢ Crime
- ▢ Distracted driving (cellphone use)
- ▢ Domestic violence
- ▢ Drug use
- ▢ Gambling
- ▢ Impaired driving (drugs/alcohol)
- ▢ Lack of exercise
- ▢ Not getting recommended immunizations
- ▢ Overeating
- ▢ Tobacco
- ▢ Unhealthy eating choices
- ▢ Vaping
- ▢ Other _____

Q8 Can you think of something that would help improve the health of your community?

_____

Q9 What type of health insurance coverage do you have? (Select all that apply)

▢ Private health insurance (e.g., through your employer, union, family member, or private plan)

▢ Public health insurance (e.g., Medicaid, Medicare, VA services, Tricare, Chip, or Indian Health Services)

▢ Uninsured (i.e., no health insurance coverage)

▢ Other (please specify) _____

Q10 I know how to access medical care in my community.

o Strongly disagree

o Somewhat disagree

o Neither agree nor disagree

o Somewhat agree

o Strongly agree

Q11 Please tell us your level of agreement with each of these sentences about your County:

Strongly disagree / Somewhat disagree / Neither agree nor disagree / Somewhat agree / Strongly agree					
I have access to good health care.	o	o	o	o	o
I am satisfied with the medical care I receive.	o	o	o	o	o
I am able to afford medical care when needed.	o	o	o	o	o
I am able to afford medications when needed.	o	o	o	o	o
I am able to get medical care when I need it.	o	o	o	o	o
I am able to see specialists when needed.	o	o	o	o	o
I am able to see my primary care doctor when needed.	o	o	o	o	o
I am able to get mental health care when needed.	o	o	o	o	o
I have access to a walk-in clinic or urgent care.	o	o	o	o	o

Q12 What medical services or specialties would you like to see offered in your area?

_____

Q13 Please tell us about access to telehealth medical care in your home.

o I do not have access to high-speed internet at home and cannot access telehealth medical care.

o I have high-speed internet, but it is not reliable or fast enough to use for telehealth medical care.

o I have high-speed internet at home, but would prefer not to use it for telehealth medical care.

o I have high-speed internet at home, but need more information about telehealth medical care before deciding.

o I have high-speed internet at home, and would be comfortable attending a telehealth medical appointment this way.

Q14 In the past 12 months, have you seen a medical provider for a routine check-up, wellness visit, or other preventive care?

o Yes

o No

o If no, why not? _____

Q18 Within the past 12 months the food we bought just didn't last and we didn't have money to get more.

o Often true

o Never true

Q19 Within the past 12 months we worried whether our food would run out before we got money to buy more.

o Often true

o Never true

Q20 What is your living situation today?

o I have a steady place to live

o I have a place to live today, but I am worried about losing it in the future

o I do not have a steady place to live (I am temporarily staying with others, in a hotel, in a shelter, living outside on the street, on a beach, in a car, abandoned building, bus or train station, or in a park)

Q21 Think about the place you live. Do you have problems with any of the following? Choose all that apply.

▢ Pests such as bugs, ants, or mice

▢ Mold

▢ Lead paint or pipes

▢ Lack of heat

▢ Oven or stove not working

▢ Smoke detectors missing or not working

▢ Water leaks

▢ None of the above

Q22 In the past 12 months has the electric, gas, oil, or water company threatened to shut off services in your home?

o Yes

o No

o Already shut off

Q23 In the past 12 months, has lack of reliable transportation kept you from medical appointments, meetings, work or from getting things needed for daily living?

o Yes

o No

Q24 How hard is it for you to pay for the very basics like food, housing, medical care, and heating? Would you say it is:

- o Very hard
- o Somewhat hard
- o Not hard at all

Q25 How often do you feel lonely or isolated from those around you?

- o Never
- o Rarely
- o Sometimes
- o Often
- o Always

Q26 If for any reason you need help with day-to-day activities such as bathing, preparing meals, shopping, managing finances, etc., do you get the help you need?

- o I don't need any help
- o I get all the help I need
- o I could use a little more help
- o I need a lot more help

Q32 What sex were you assigned at birth, on your original birth certificate?

- o Male
- o Female

Q33 How do you describe yourself? (select one)

- o Male
- o Female
- o Transgender
- o Do not identify as male, female, or transgender

Q34 Which of these groups best describes your race? Please select all that apply.

- ▢ White/Caucasian
- ▢ Asian
- ▢ Black or African American
- ▢ American Indian or Alaskan Native
- ▢ Native Hawaiian or Other Pacific Islander
- ▢ Other (please specify) _____

Q35 Are you of Hispanic or Latino origin or descent?

- o Yes, Hispanic or Latino
- o No, not Hispanic or Latino

Q36 What is the highest level of education you have completed?

- o Less than high school graduate
- o High school diploma or equivalent (GED)
- o Some college or certification
- o Technical or vocational degree/certification
- o Associate degree
- o Bachelor's degree or higher (includes any advanced degrees)

Q37 What is your estimated yearly household income?

- o Less than $15,000
- o $15,001 to $20,000
- o $20,001 to $25,000
- o $25,001 to $30,000
- o $30,001 to $35,000
- o $35,001 to $40,000
- o $40,001 to $50,000
- o $50,001 to $60,000
- o $60,001 to $70,000
- o $70,001 to $85,000
- o $85,001 to $100,000
- o $100,001 to $150,000
- o More than $150,000
- o Prefer not to answer

Q38 What is your marital status?

- o Married or in a domestic partnership
- o Divorced
- o Never married
- o Separated
- o Widowed
- o Other (please specify) _____

Q39 How many children under the age of 18 live in your household? Please enter a whole number even if you are not the primary caregiver or biological parent.

_____

Q40 How were you invited to complete this survey?

- o Invitation in my electronic medical record
- o Personal email invitation
- o My employer
- o Social media
- o Friend or family member
- o Public school, library, or other community organization
- o Other _____

Q41 Is there anything else you would like to say about health in your community?

_____

Q36 - Is there anything else you would like to say about health in your community?

Is there anything else you would like to say about health in your community?
I am very satisfied with the care provided by WVU Medicine and I would love to see services expanded in Greene county so it more accessible to others in my community.
N/A
It needs to get better.
WVU Uniontown Hospital accepting Highmark Freedom Blue insurance would improve healthcare in the community
No
Mental health in this area is terrible. Transportation is an issue in this area. Education is also an issue
Personally, I have been satisfied with the care received by my PCP, WVU and WVU/Uniontown.
I realize alot ot people rely on public assistance to buy food. I don't understand or agree that this assistance allows for unhealthy food. Shopping carts loaded with sugary drinks and food just contributes to more health disparities among adults and children- it is not helping but it is hurting them and they may be totally unaware of the implications.
Fayette County is just not a healthy county.
No
no

Uniontown Hospital needs to do better in ER for cancer patients and others that come in sick. I would never go there as it is not safe to sit for hours sick. Ask patients that go to UPMC ER and we can tell you how we are seen when walking in door when we have cancer.

We need a SAFE wellness center with a pool that is affordable with extended hours

NO

Q12 - What medical services or specialties would you like to see offered in your area?

29 Responses

What medical services or specialties would you like to see offered in your area?
Womens health, mental health, and more PCP's
Emdocrinology
Additional pediatricians
Weight management
Specialists in urology, dermatology , outpatient surgery center, more testing offered locally such as mammograms.
Care for veterans
diabetes education; endocrinologist
Acceptance of my Highmark Freedom Blue PPO insurance so I don't have to travel distances to receive preventative and other healthcare needs.
Mental health and wellness opportunities
endocrinology and dermatology
Walk in clinic
More clinics related to obesity

Endocrinologist and nutrition specialist
More special care type of doctors
Transportation
Mental health
Endocrinology, rheumatologist
Endocrinology
Urgent care that my insurance allows/covers and also wellness/preventative care clinics
Endocrinology at the hospital
GERIATRIC
in hospital alcohol abuse center
Unsure
Rheumatologist, Increased Pain Management
Behavioral Health
services for osteoporosis
I would not feel safe going to Uniontown ER with my cancer with all the horrible reviews about Uniontown ER.
Ob, substance use providers
